

NEW PRODUCT: HIGH CLING FOAMING CUTTING FLUID

CT-90 Foam has been specifically formulated to cling to the work piece right up to the tool edge, making applications even on vertical surfaces possible while keeping the lubricant in contact with both job and tool.

Formulated with extreme pressure (EP) additives, it can be used on all tough metals including stainless steel, high-carbon steel, and Nimonic alloys; improving cutting speed, tool life and surface finish. Virtually zero fuming in use.

Part of the popular CT-90 range (bulk oil, spray, compound, poly bottle), CT-90 foam dissipates heat, reduces cutting time, swarf build-up, metal scrap and downtime. Protects and extends the life of the tool.

CT-90

FOAMING CUTTING AND TAPPING FLUID

- Clings to vertical surfaces and tool edges
- Dissipates heat, preventing seizing
- Speeds up cutting time
- Improves surface finish
- Protects and extends the life of the tool
- Virtually zero fuming in use
- Non-flammable

Fill size: 400ml

Product code: 2098

WHICH CT-90 IS RIGHT FOR YOU?

PRODUCT	APPLICATION	CODE	MRSP ex vat	
CT-90 Foam NEW	All metal cutting, especially on vertical surfaces where the controlled, stable foam reduces run-off and clings to work area. Almost zero fuming/smoke in use.	2098	£8.49	
CT-90 Spray BEST SELLER	Highly effective, traditional spray for use on work pieces that are flat/horizontal. Controlled spray pressure delivers optimal amount of oil to the work area.	1846	£7.78	
CT-90 Poly Bottle Liquid	Poly bottle for the controlled application of CT-90 to work pieces. Can be flood applied or precise/measured application direct to the cutting spot.	1483	£10.04	
CT-90 Compound	Traditional compound for application to cutting tools and drill bits prior to use. Highly adhesive paste will not fling off and may be reapplied to non-moving tools.	1528	£10.35	
CT-90 Liquid	CT-90 in a bulk (5L) option for flood application to larger work pieces and for use in larger cutting machines. Same great performance as the rest of the CT-90 range.	1495	£75.55
